

New WAAS GEO Status as of 6/13/06

PanAmSat, Galaxy-15, W133 deg, PRN -135 (48)

Operating in Test Mode with Corrections, integrity of GEO ranging not available

Monday	6/12/06	On air, datalink of corrections No planned outages
Tuesday	6/13/06	On air, datalink of corrections Occasional brief outages during switches between uplink stations
Wednesday	6/14/06	On air, datalink of corrections Occasional brief outages during switches between uplink stations
Thursday	6/15/06	On air, datalink of corrections No planned outages
Friday	6/16/06	On air, datalink of corrections Single short outage planned near 6/15 to 6/16 UTC day rollover
Saturday	6/17/06	On air, datalink of corrections No planned outages
Sunday	6/19/06	On air, datalink of corrections No planned outages
Monday	6/20/06	On air, datalink of corrections TBD planned outages
Tuesday	6/20/06	TBD

Telesat, ANIK-1fR, W107.3 deg, PRN -138 (51)

Operating in Test Mode with Corrections, GEO ranging not available

Monday	6/12/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes
Tuesday	6/13/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes
Wednesday	6/14/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes
Thursday	6/15/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes
Friday	6/16/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes
Saturday	6/17/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, no outages planned
Sunday	6/19/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, no outages planned
Monday	6/20/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes
Tuesday	6/20/06	On air, test ranging (UDREI's and corrections) being provided for PRNs 135 and 138, occasional brief outages for uplink switching and software tuning parameter changes

Caution

- 1) The service from both of these GEOs is still undergoing test and has not been certified and is not yet being operated to FAA standards
- 2) Unplanned outages may occur at any time
- 3) The schedule information above may change without notice
- 4) The signals will be left on overnight and weekends but repairs will not be accomplished until the next normal working shift if there is a failure
